Cricket Player Performance Tracking Application : CRICKSTATS

Activity 1	**Create Custom Fields for Player Object**
Type	Story
Duration	10m

Description

1. In your Salesforce org, click the gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don’t see it, enter Object Manager in the Quick Find box.

3. From the Object Manager page, in the Quick Find box, search for the custom object you just created: **Player**.

4. From the sidebar, click **Fields & Relationships**. Notice that there are already some fields there. Those are the standard fields.

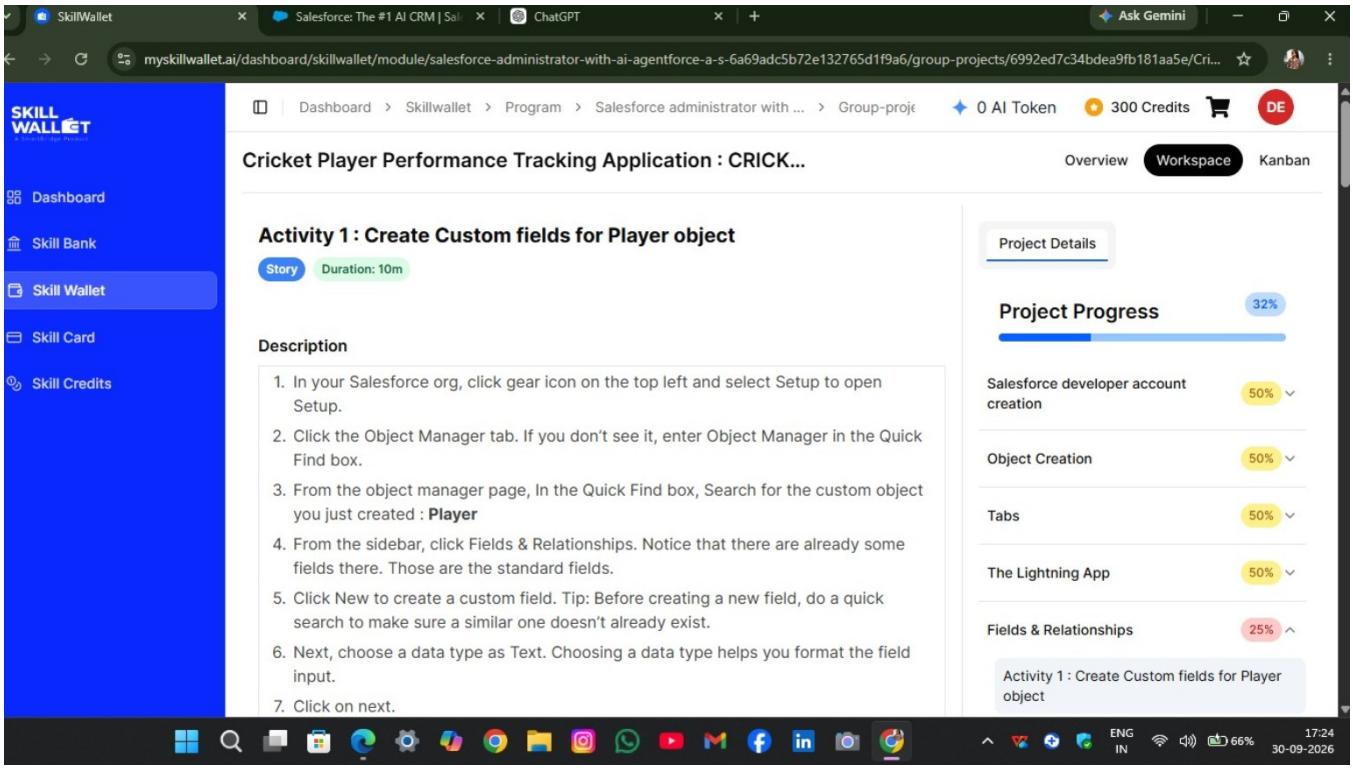

5. Click **New** to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn’t already exist.

6. Next, choose a data type as **Text**. Choosing a data type helps you format the field input.

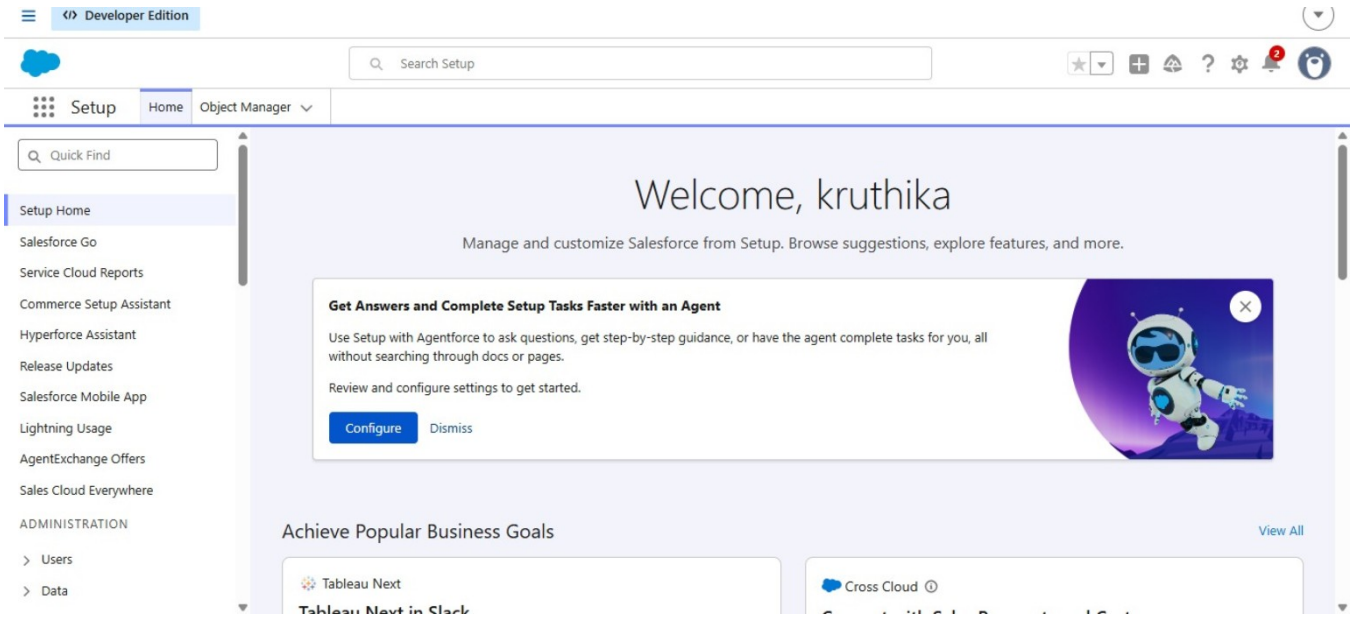

7. Click **Next**.
